**IMPORTANT BACKFLOW ASSEMBLY TEST NOTICE:**  
Courtesy Reminder: Annual Backflow Test Form due in 60 Days

**THIS WILL BE YOUR ONLY ADVANCE NOTICE**

The backflow prevention device installed on the premise owned or controlled by you, requires its annual testing. Return the completed Backflow Test Form by 0/00/0000.

Per Ordinance 04-01, Casitas requires that a backflow prevention device be installed at the water meter location, and be tested annually thereafter, to protect the domestic water supply. For more information, see California Code of Regulations, Title 17, Section 7605.

Annual testing must be performed by a tester recognized and certified as a Certified Backflow Tester by the County of Ventura Environmental Health Division. A list of Certified Testers is located on our website, [www.casitaswater.org](http://www.casitaswater.org), under the "Quick Links" tab, subcategory "Backflow Tester".

Send the completed Backflow Test Form to Casitas MWD by its due date. Failure to submit the form on time will result in **water service termination**, until we receive the appropriate Backflow Test Form.

If you have any questions, please contact us immediately.
