

The Everglades Foundation Internship Program

The Everglades Foundation internships are available in a range of topics related to Everglades restoration. Interns interested in Everglades restoration will have the opportunity to work side-by-side with an experienced scientist, engineer, or planner on a variety of topics, including field investigations in hydrology, ecology and water quality in the Everglades, scientific/technical analyses related the Comprehensive Everglades Restoration Plan, and policy and advocacy of Everglades restoration.

Eligibility

Undergraduate juniors or seniors, recent graduates, graduate students and post-graduate associates are eligible for the Internship Program. The internships are open to students or recent graduates in the natural sciences, physico-chemical and biological sciences, engineering, geography, planning, resources management, law, economics, and the social sciences. We are especially interested in students pursuing cross-disciplinary studies.

Positions

The internships are for full-time employment in the summer, and can include one semester of part-time work. The summer will be spent at the Everglades Foundation offices, although the part-time component could be at the intern's university. Salaries range from \$12 to \$20 per hour, depending upon education and experience.

The Application Process

All students who wish to be considered for the Everglades Foundation Internship should submit a cover letter, resume and a brief Statement of Interests. The Statement of Interests should include your professional interest, your personal interest in Everglades restoration, and your unique skills and abilities.

Submit the package or questions to fellowship@evergladesfoundation.org. Electronic submissions are preferred, although printed versions will be accepted, and may be sent to:

Everglades Foundation Fellowship Program
The Everglades Foundation
18001 Old Cutler Road, Suite 625
Palmetto Bay, FL 33157.

Applications will be assessed periodically from October 1, 2009 until June 1, 2010 until suitable candidates have been identified. Therefore, applicants are encouraged to apply as early as possible.
